Under these services, the Portfolio Manager advises the Client on investments in general or any specific advice required by the Clients and agreed upon in the Client agreement. The Portfolio Manager will render the best possible advice to the client having regard to the client's needs and the environment, and his own professional skills. The same can be binding or non-binding in nature or in such terms as mentioned in the Client agreement. For such services, the Portfolio Manager charges the Client a fee for services rendered mentioned in the Client agreement. The advice may be either general or specific in nature and may pertain to a particular portfolio. Entry/exit timing, execution and settlement are solely the Client's responsibility.

6. INVESTMENT STRATEGIES OFFERED

Equity Strategy:

6.1 Strategy Name: Bluechip

i. **Fund Manager:** Mr. Shailesh Saraf

ii. **Investment Objective:**

To create long term wealth by investing in portfolio of quality stocks with good valuation and generate alpha both in rising and falling markets

iii. **Description of types of securities**

Listed equities

iv. **Basis of selection of such types of securities as part of the investment approach**

This Strategy has quality large and midcap stocks with high sales & profit growth and low valuation

v. **Allocation of portfolio across types of securities**

Defining the Universe: Market Cap ranks 1 to 250 on the National Stock Exchange of India are included in the universe. • Research: The stocks are selected based on the criteria of High growth and Low valuation. • Historical back testing: The Value Stocks research team conduct historical back testing to ensure that only consistently outperforming strategies are selected. • Constituent Screening: The research team does individual stock picking after going through company reports and financials and decides on a host of qualitative and quantitative parameters. • Weighting: Stocks are equally weighted to reduce risk and mitigate individual biases.

vi. **Benchmark to compare performance: NIFTY 50 TRI and Nifty LargeMidcap 250**

vii. **Basis for choice of benchmark**

The strategy is compulsorily benchmarked against NIFTY 50 TRI as per recent SEBI and APMI norms related to benchmarking. Also, since strategy aims to invest in companies from Market Cap rank 1 to 250 on the National Stock Exchange of India the strategy will be benchmarked against Nifty LargeMidcap 250 to accurately reflect the core philosophy of the strategy.

viii. **Indicative tenure or investment horizon**

The objective of the strategy is to generate alpha and create wealth over the long term, using an adaptive investment approach to navigate the dynamic business and market cycles that last 3-5 years. Thus the ideal investment time horizon should range between 3 to 5 years and above.

ix. Risks associated with the investment approach:

Being primarily a long only equity strategy, the strategy may invest substantially in equity and equity related securities which are prone to market volatility and price fluctuations, and hence the strategy bears both systematic market risks and unsystematic stock specific risks. The performance in the equity portfolios may be adversely affected by the performance of individual companies, due to company specific, industry specific, macroeconomic and regulatory factors. The past performance of the Portfolio Manager is not indicative of the future performance. The inability of the portfolio to make intended securities purchase due to settlement problems could cause the portfolio to miss certain investment opportunities, while the inability to sell securities, held in the strategy's portfolio may result, at times, in potential losses to the portfolio, should there be a subsequent decline in the value of securities held in the strategies portfolio. The Portfolio Manager is not responsible or liable for any loss resulting from the operations of the portfolio management services. Investment decisions made by the Portfolio Manager may not always be profitable. After accepting the corpus for management, the Portfolio Manager may not get an opportunity to deploy the same or there may be delay in deployment. In such situations, the clients may suffer opportunity loss. Frequent rebalancing of Portfolio will result in higher brokerage/transaction cost. Investments in equity and equity related securities involve a degree of risk and investors should not invest in the strategy unless they are willing to take the risk of losing their investment.

GENERAL RISK

- a) **Market risk:** The value of a financial instrument may fluctuate dramatically due to different market factors including the price or level of any underlying reference asset, level of interest rates, credit quality of the issuer and guarantor (where applicable), foreign exchange rates, volatility, liquidity and tenor remaining on the financial instrument (if relevant). Such financial instrument may depreciate in value as quickly as it may appreciate and can also become valueless. Investing in such financial instrument is as likely to incur losses as it is to make profit. Past performance should not be used as an indicator of future performance.
- b) **Underperformance risk:** This is not a deposit. There is no guarantee from Dynamic Equities or any other party that you will be able to earn returns under any type of investment that will be greater than or at least equal to any potential return you may have earned from a bank deposit or direct investment in any nonstructured fixed coupon bond. There is also a risk that you may not receive any returns and may in fact incur losses on your investment.
- c) **Small and medium sized companies:** The prices of securities of small and medium sized companies tend to be more volatile than those of larger sized companies due to the lower prices of their shares, greater sensitivity to changes in economic conditions and higher uncertainty over future growth prospects.
- d) **Changes in investment policy:** The manager of a fund typically has the authority to alter its investment policy within certain parameters (set out in its constitutional document) by amending the fund's prospectus. This could represent a fairly significant change in the nature and risk profile of the fund from the one in which you originally invested.
- e) **Standard Risk Factors:** Investment in mutual fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk, including the possible loss of principal. As the price / value / interest rates of the securities in which the Scheme invest fluctuates, the value of your investment in the Scheme may go up or down. In addition to the factors that affect the value of individual investments in the Scheme, the NAV of the Scheme can be expected to fluctuate with movements in the broader equity and bond markets and may be influenced by factors affecting capital and money markets in general, such as, but not limited to, changes in interest rates, currency exchange rates, changes in Governmental policies, taxation, political, economic or other developments and increased volatility in the stock and bond markets due to any force majeure causes. Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the Scheme.

7. RISK FACTORS

- a) Investments in Securities are subject to market risks and include price fluctuation risks. There are no assurances or guarantees that the objectives of investments will be achieved. The investments may not be suited to all categories of investors.
- b) The past performance of the Portfolio Manager does not indicate its future performance.
- c) The names of the Strategies do not indicate in any manner their prospect or returns, nor does it guarantee the performance or returns on the Strategy. The performance in the equity Strategies may be adversely affected by the performance of individual company's changes in the market place and industry specific and macro-economic factors.
- d) The investment strategy will be drawn up considering the current and expected market movement and trends. Though all endeavours shall be made by the Portfolio Manager to diversify the risk, the risk of below market performance is not ruled out.
- e) If the Portfolio has a high/lower exposure to any particular sector or company, there is an additional risk due to over/under dependence on one sector/company.
- f) Technology stocks and some of the investments in niche sectors run the risk of volatility, high valuation, obsolescence and low liquidity.
- g) The Client who is an NRI or an FII, shall at all times keep the Portfolio Manager well informed about all the investments made by the Client in India, in each of the companies, and each time when he/it proposes to invest in any company it shall be the responsibility of the Client to ensure that his/its existing investments including investment made by the Portfolio Manager on his/its behalf together with proposed investments in the Issuer/Company, in which investment is proposed, are within the permitted limits, prescribed under FEMA and rules and regulations made there under.
- h) Each Portfolio will be exposed to various risks depending on the investment objective, investment strategy and the asset allocation. The investment objective, investment strategy and the asset allocation may differ from Client to Client.

23 ACCOUNTING POLICY/ VALUATIONS

DEPL PMS follow an accounting and reporting system that is consistent with the Global Investment Performance Standards methodology. The important accounting policies are:

- a. Client Accounts: All client accounts will be maintained separately on an accrual basis based on market values. Accounting will be trade date based (not settlement data based).
- b. Income Accrual: Dividend income shall be recognized on the ex-dividend date. Interest income shall be accrued on due dates. Profit or loss on the sale of investments shall be recognized on trade dates. Bonus shares/units to which the security/scrip in the portfolio becomes entitled will be recognized only when the original share/scrip on which bonus entitlement accrues are traded

on the stock exchange on an ex-bonus basis. Similarly, right entitlements will be recognized only when the original shares/security on which the right entitlement accrues is traded on the stock exchange on the ex-right basis.

- c. Recognition: Transactions for purchase or sale of investments shall be recognised as of the trade date and not as of the settlement date, so that the effect of all investments traded during a Financial Year are recorded and reflected in the financial statements for that year. Purchase/Sale consideration will be calculated by applying the "weighted average cost" method. Where investment transactions take place outside the stock exchange, for example, acquisitions through private placement or purchases or sales through private treaty, the transactions shall be recorded, in the event of a purchase, as of the date on which the scheme obtains an enforceable obligation to pay the price or, in the event of a sale, when the scheme obtains an enforceable right to collect the proceeds of sale or an enforceable obligation to deliver the instruments sold.
- d. Cost of investments: The cost of investments acquired or purchased shall include brokerage, stamp charges and any charge customarily included in the broker's contract note. In respect of privately placed debt instruments any front-end discount offered shall be reduced from the cost of the investment.
- e. Portfolio Management Fees: Portfolio management fees could include a fixed management fee and a variable performance fee. The amount of fixed and variable fees will be as agreed with the client and defined in the Client Agreement. Issues related to the frequency at which fees are charged and how they are calculated will also be as defined in the Client Agreement with each individual client. The fixed management fee will be as agreed in the Client Agreement terms and conditions and is payable quarterly. The performance fees as agreed with the client in the Client Agreement will be based on returns over a hurdle rate as agreed in the Client Agreement, with a high watermark. Performance fees will be charged on performance over the hurdle rate, management fee and any costs of trading charged annually.
- f. Brokerage: The client understands that PI PMS shall conduct all securities transactions with its registered brokers or any registered broker at a brokerage/commission in line with market practices upto 0.50% of the value of each transaction.
- g. Other Expenses: Besides this the client will be liable for custodian fees annual. The custodian fees will be upto 0.50% of the assets under management annually (paid in monthly increments) and fixed rupees or % of each transaction as stated exactly in the Client Agreement. All relevant taxes apply.
- h. Valuation of Investments: Investments in Equities, Mutual Funds and Debt instruments will be valued at the closing market prices of BSE or NSE as the case may be, or the Repurchase Net Asset Value declared for the relevant Strategy on the date of the report or any cutoff date or the market value of the debt instrument at the cutoff date. Alternatively, the last available prices on the exchange or the most recent Net Asset Value will be reckoned. In the event of this date being a holiday at the exchange, the rates as on the immediately preceding trading day shall be adopted. If no such quote is available, the security may be considered non-traded. Government securities shall be valued at the prices released by an agency recommended by the AMFI. Unlisted, not traded and all other securities, where a valued cannot be ascertained shall be valued as determined in good faith by the Portfolio Manager.
- i. Aggregation of trades: In the event of aggregation of purchases or sales for economy of scale inter se, the Portfolio Manager shall do allocation on pro rata basis at weighted average price of the day's transaction. The Portfolio Manager will not keep open position in respect of allocation of sales or purchases in a day.

- j. Holding cost: In determining the holding cost of investments and the gains or loss on sale of investments, the “first in first out FIFO” method will be followed. For derivatives and futures and options, unrealized gains and losses will be calculated by marking to market the open positions. Unrealized gains/losses are the differences, between the current market value/Net Asset Value and the historical cost of the Securities.
- k. Dividends: Dividends on shares and units in mutual funds shall be accounted on ex-dividend date, interest, stock lending fees earned etc., shall be accounted on receipt basis. The interest on debt instruments shall be accounted on receipt basis.

The Portfolio Manager can adopt any specific norms or methodology for valuation of investments or accounting the same at its discretion.

24 SECURITY

The Client shall not disclose to any person, firm, company or institution whomsoever (except with the authority of the Portfolio Manager or except as required by the law; or unless ordered to do so by a court of competent jurisdiction on any relevant regulatory authority) any information relating to the business, investments, finances or other matters of a confidential nature of the Portfolio Manager of which it may in the course of its duties hereunder or otherwise become possessed and each party shall use all reasonable endeavours to prevent any such disclosure as aforesaid.
